Flag question

Who initializes the Response Object?

- ☒ a. Container
☐ b. Servlet
☐ c. Tomcat Server
☐ d. None of the others
- Clear my choice

Question 12
Answer saved
Marked out of 1.00
Flag question

assume that all library files are imported, consider the code in the files:

processingServlet.java

```
...
ArrayList<Book> list=new ArrayList();
list.add(new Book("b1","test1"));
list.add(new Book("b2","test2"));
list.add(new Book("b3","test3"));
request.setAttribute("data", list);
response.sendRedirect("index.jsp");
...
```

index.jsp

```
...
<foreach var="b" items="${requestScope.data}">
<>${b.id} ${b.title}</p>
</foreach>
...
```

What is the output when processingServlet.java runs?

- ☐ a. display three paragraphs that are null
☒ b. display three paragraphs that are empty string
☐ c. display three paragraphs that contain id and title of the books
☐ d. None of the others
- Clear my choice

Question 13
