Styling Syntax and Theory

Latest Submission Grade 100%

1. Which of the following is not an option for specifying a color in CSS3?

1 / 1 point

- ☐ Use a hexadecimal value
- ☐ Use the color name
- ☐ Use an rgb value
- ☒ All of these options are valid.

✔ Correct
Yes, they are all options!

2.If your body tag uses the style attribute **style="text-align:center"**, you can overwrite that property by using the CSS3 rule.

1 / 1 point

```
1 body{
2   text-align: left;
3 }
```

- ☐ True
- ☒ False

✔ Correct
The style attribute has a higher precedence so the browser will align the text to the left, not the center.

3.What is wrong with the following code?

1 / 1 point

```
1 body{
2   color: ■#000000;
3   background-color: □#FFFFFF
4   font-family: Times, Arial, Cursive;
5 }
```

- ☒ There is a missing semicolon
- ☐ You can't style three properties in a single rule
- ☐ This is a valid rule

✔ Correct

4.Assume the following rule is the only one that styles the body element:

1 / 1 point

```
1 body{
2   font-family: Cursive, Helvetica, Verdana;
3 }
```

What happens if the browser doesn't support Cursive or Helvetica?

- ☐ The text will not be displayed
- ☒ The text will be displayed in Verdana
- ☐ The text will be displayed in Cursive

✔ Correct
The browser applies the first value that matches from left-to-right.

5. The browser defaults override rules specified in an external style sheets.

1 / 1 point

- ☐ True

☒ False

✓ Correct

6. Using the code below, will the body of the page have the background-color defined in the file style.css or the background color define in the <style> tag?

1 / 1 point

```
1 <head>
2   <meta charset = "UTF-8">
3   <title>Test code</title>
4   <link rel "stylesheet" href = "style.css">
5   <style>
6     body{
7       background-color: #4CCDD;
8     }
9   </style>
10 </head>
```

☒ <style>

☐ style.css

✓ Correct

7. Internal styling (rules specified in the <head> section) override rules specified with the style attribute in a tag.

1 / 1 point

☐ True

☒ False

✓ Correct

8. The default display value for paragraphs is:

1 / 1 point

☒ block

☐ inline-block

☐ inline

☐ none

✓ Correct

9. The default display value for is:

1 / 1 point

☒ inline

☐ block

☐ none

☐ inline-block

✓ Correct

10. A block element takes up the full width of it's parent, even if the content is smaller than the parent. So two block elements at the same will not be side-by-side.

1 / 1 point

☒ True

☐ False

✓ Correct

11. Inline elements take up the full width of the browser, even if the content is smaller than the browser size.

1 / 1 point

☐ True

☒ False

✓ Correct

12. Which CSS3 property is used to center text? (Only provide the property name; do not give it a value.)

1 / 1 point

- ☐ text-center
- ☐ align
- ☒ text-align
- ☐ center

 **Correct**

13. Which of the following is the best way to convey that your text has special meaning?

1 / 1 point

- ☐ Using a larger font size to signify the important text
- ☐ Using colors to signify the important text
- ☒ Using semantic tags in addition to color and/or font.
- ☐ Using a combination of font size and color to signify the important text

 **Correct**
Yes! The semantic tags convey meaning that goes beyond appearance
