

Question 21

Answer saved

Marked out of 1.00

 Flag question

Select the incorrect statements about Use Case models

- ☐ a. Each use case represents a discrete task that involves external interaction with a system.
- ☒ b. Use cases not only deal in the functional requirements but also other requirements such as business rules, quality of service requirements, and implementation constraints
- ☐ c. A use case diagram does not show the detail of the use cases: it only summarizes some of the relationships between use cases, actors, and systems.
- ☐ d. Use case diagrams give a fairly simple overview of an interaction so you have to provide more detail to understand what is involved.
