

Question 41

Answer saved

Marked out of 1.00

Flag question

Which mission of JSP Engine does?

☐ a. Generate Servlet Code, Compile Servlet, Generate Mapping into Web Deployment Descriptor (web.xml), and Instantize Servlet

☒ b. Parse JSP File, Generate Servlet Code, Compile Servlet, and Instantize Servlet

☐ c. None of the others

☐ d. Compile JSP into Java Class, Generate Mapping into Web Deployment Descriptor (web.xml), Generate Request and Response Object, Forward to Resource

Clear my choice

Question 42

Answer saved

Marked out of 1.00

Flag question

What memory scope is used to store data that exists until the session is closed, session is time out, or server is crashed?

☐ a. Request scope

☐ b. Context scope

☒ c. Session scope

☐ d. page scope

Clear my choice

Question 43

Answer saved

Marked out of 1.00

Flag question

What way is used to transfer data from the resource (jsp or servlet) to the other resource?

☐ a. `response.sendRedirect(url);`

☒ b. `request.getRequestDispatcher(url).forward(request,response);`

☐ c. `request.dispatcher(url).send();`

☐ d. `request.sendRedirect(url);`

Clear my choice

Question 44

Answer saved

Marked out of 1.00

Flag question

Choose the right option about "servlet" in java

☐ a. The Web server creates multiple threads for the same Servlet instance to service multiple client's requests

☐ a. It is a Filter that applied to application when the user uses browser send request to container

☐ b. None of the others

☒ c. It is another Filter that receive information from Main Filter (Dispatch Filter)

Clear my choice

Question 46

Answer saved

Marked out of 1.00

Flag question

What is data-source?

☒ a. Logical name binds to database server address with its authentication and connection drivers

☐ b. Logical name is get from database's name

☐ c. Logical name binds to context path that is in the context.xml file and container read it at deploy time

☐ d. None of the others

Clear my choice

Question 47

Answer saved

Marked out of 1.00

Flag question

Which mechanism does forEach function of core taglib library of JSTL executes?

☐ a. None of the others

☒ b. Loop depends on event on tag when the collection's item is existed

☐ c. Loop depends the while control structure when collection's item is existed

☐ d. Loop depends the container reading the size of collection

Clear my choice

Question 48

Answer saved

Marked out of 1.00

Flag question

Consider the code:

```
...
String myvalue=request.getParameter("txtname");
Select * From Registration Where uName = ?
```

What can be used to set the myvalue variable to "?" ?

☐ a. Using ResultSet

☐ b. Using Connection

☐ c. using Statement

☒ d. using the PreparedStatement

Clear my choice

Question 49

Answer saved

Marked out of 1.00

Flag question

Assume that path is valid, consider the code in two servlets:

```
firstServlet.java
protected void processRequest(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {
    request.setAttribute("us","Testing");
    request.getRequestDispatcher("secondServlet").forward(request,response);
}
...
secondServlet.java
protected void processRequest(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {
    try(PrintWriter out = response.getWriter()) {
        String data=request.getParameter("us");
        out.println(data);
    }
}
}
```

What is the result when the first Servlet runs?
