Week2 - Peer Review Assignment by Anonymous Learner

♡ Like 🏳 Flag this submission March 23, 2022 PROMPT Select a public website that you use enough to be familiar with what a typical user may want to do. This website should not require the peer reviewer to sign up for an account or pay to use the site in any way. The website should also not, to the best of your Is the quality attribute clearly identified? knowledge, serve malware, use JavaScript to complete cryptocurrency mining, or any other negative practice that might harm the peer reviewer. Select three quality attributes that are likely to be important when deciding a website architecture for the website you chose. You can use usability, security, performance, reliability, or any other reasonable quality attribute as the basis of your selection. Briefly explain the importance of each quality attribute as it relates to the software/service you selected. Is the quality attribute explanation of importance Then, for each selected quality attribute, write one scenario that would help quantitatively assess whether the software solution meets its goal. You shall write your scenarios using a format that was presented in the lectures. Is the quality attribute explanation of importance Write your first selection, discussion of importance and scenario here. Website: www.youtube.com 1 pt Yes 1. Performance: Since there are a lot of videos available on the database to choose form, it is important to design the architecture of this website such that users can search for and access videos quickly. Scenario: Measure the time it takes for the website to load the videos corresponding to a keyword that a user searches. Is the quality attribute explanation of importance well-written (clear language, proper grammar, correct spelling)? 1 pt Yes Is the scenario content present? 1 pt Yes 1 pt Yes Is the scenario content reasonable? 0 pts No 1 pt Yes Is the scenario content well-written (clear language, proper grammar, correct spelling)?

Write your second selection, discussion of importance and scenario here. 2. Useability: There are many actitivies that a user can do on the website, such as: playing videos, leaving comments, searching for videos, looking up watch history, subscribing to channels. It is important to choose an architect that can provides users with ease of use. Scenario: Organize a testing period for new features, in which users are allowed to try experiencing the new feature and provide feedbacks on usability.

Is the quality attribute clearly identified? Is the quality attribute explanation of importance present?

Does the scenario capture a measurement of the quality attribute identified?

Does the scenario follow one of the formats
